EF AI-61R Inhibitor

General

This product is mainly used as the high-quality inhibitor of vinyl monomer, which is widely applied in the production of acrylic acid, acrylic acid ester, and also acts as the silk screen ink and agents for other composite materials.

Properties

Chemical name : N,N-dibutyl dithiocarbamic acid copper

CAS No. : 13927-71-4

Molecular formula : C₁₈H₃₆N₂S₄Cu

Physical data

Appearance : Black brown powder
molecular weight : 472.28

Specifications

Assay : ≥95.0%
Melting point : 73-76°C
ASH : ≤20%
Volatile : ≤0.5%

Packaging and Storage

25kg fiber bag, Avoid knock, fire, insolation and rain. Kept in dry and ventilating place, far away from heat and fire.
